COLIBRI M
2080/1/NE
MARTINELLI LUCE

IP 20

Modular System with swivel tubular modules, for LED light source. A spherical magnet joint allows Colibrì to be tilted at different angles, creating various configurations in the space it is placed in. Colibrì can be hung as single modules or joined through a power cable having 1/2/3 continuous modules. These can then be connected to the remote driver or placed inside the ceiling rose. The color given by the iridescent radiant film exalts its dynamic characteristics (optional). Dimmable driver on request
