Projectors for outdoor use with IP 67 protection rating available in 5 sizes and 9 different beam angles. The specific Revo optical system allows the entire family to have very small dimensions and outstanding performance factors with visual comfort translated into UGR factors <13. The primary aspects of the technical research were aimed at total respect for architectural and environmental contexts, obtaining a strong miniaturisation of volumes and an excellent management of photometric yields that we wanted to complete with an offer of natural and material colours for perfect camouflage. Available in base, stake, bollard at mains voltage or 48v, with on-board or remote driver.
